Dear Bob:

The annual report of the variety trial project at CSUF follows #83-L1.

The trees in the CSUF trial were not pollinated in the Spring of 1983 in hopes of getting vigorous growth and a strange frame work for the first productive season which will be in 1984. Seven new mid-season varieties were ordered to plant in 1984.

Sincerely yours,

A handwritten signature in cursive script that reads "Allan A. Hewitt".

Allan A. Hewitt, Ph.D.
Professor of Horticulture
